ACS INSTRUMENT 7400S - LEAK TESTER

Customers rate us on Guaranteed Reviews Company, have a look at their feedback.

SKU: 12158 | **Categories:** Analysis equipment for laboratory, Laboratory machines, Miscellaneous equipment

PRODUCT DESCRIPTION

Manufacturer : ACS Instrument

Model: 7400S

Year : 2019

Type : Leak test bench / automatic and autonomous leak detector

Application: Integrity test for flexible containers (flexible packaging, pouches, envelopes, etc.)

contact@osertech.eu / +33 2 37 90 28 78

EM delta P: +- 5000 Pa

Pressure test: -55 hPa to 950 hPa

Motor power : 0,75 kW

The cup is placed in a sealed enclosure. A vacuum is applied in the enclosure, causing the cup to inflate.
The inflated cup is clamped between the two horizontal walls of the enclosure and exerts a force on the internal pressure sensor. The force exerted on this sensor is the image of the internal pressure of the cup.
The leak test consists of measuring a variation in the force on the internal pressure sensor between the start and end of the stage.

A touch screen for controlling and setting the instrument parameters.
A USB key for exporting results.
