**SKU:** 12158 | **Categories:** <u>Analysis equipment for laboratory</u>, <u>Laboratory machines</u>, <u>Miscellaneous equipment</u>

#### PRODUCT DESCRIPTION

Manufacturer: ACS Instrument

Model: 7400S

Year: 2019

Type: Leak test bench / automatic and autonomous leak detector

Application: Integrity test for flexible containers (flexible packaging, pouches, envelopes,

etc.)

EM delta P: +- 5000 Pa

Pressure test: -55 hPa to 950 hPa

Motor power: 0,75 kW

The cup is placed in a sealed enclosure. A vacuum is applied in the enclosure, causing the cup to inflate.

The inflated cup is clamped between the two horizontal walls of the enclosure and exerts a force on the internal pressure sensor. The force exerted on this sensor is the image of the internal pressure of the cup.

The leak test consists of measuring a variation in the force on the internal pressure sensor between the start and end of the stage.

A touch screen for controlling and setting the instrument parameters. A USB key for exporting results.
