PRODUCT DESCRIPTION

Specially designed for continuous use on fixed installations, the CFM 3306 is ideal for use in the pharmaceutical, chemical, paper and food industries. Its small base requires little space and gives it great manoeuvrability in narrow areas.

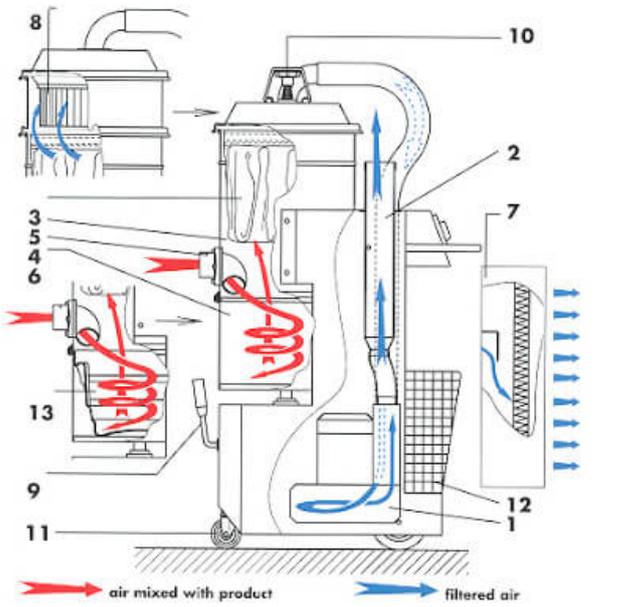

Example of use :
General cleaning around process equipment.
Spot suction on a production line.

Fixed installation on laser-equipped machines.

- Removable debris reception container.
- External handle for filter vibration.

On request: HEPA filter (High Efficiency Particulate Air) can be installed downstream of the motor.
