DANCREME® - Haas Food Equipment

**DANCREME®**

The DANCREME® mixing plants (concept by DANGER) are used for the fully automatic production of fat creams for wafer fillings. They feature a modular design and are available in various capacities, configurations and degrees of automation as desired by the customer.

- Technical Data:**
- jacketed mixing tank with 300 or 600 l capacity, mixing turbine, wall scraper and cutting shaft
  - automatic weighing and dosing of ingredients
  - homogenizer for cream refining after mixing
  - automatic feeding to cream spreading machine
  - cleaning-in-place (CIP): cleaning of the plant possible without disassembly

**HAAS ENDPRODUCTS**  
From Biscuits, Wafers over  
Marshmallows to PVC.
