### PRODUCT DESCRIPTION

#### DOYPACK FILLING AND SEALING MACHINE

Capacity: from 0.1 to 1 l

Maximum weld length: 200 mm.

Maximum production rate: from 200 to 600 bags/hour depending on volume, product and

user.

- Empty bag storage area
- Device for opening bags by inflation (compressed air)
- Volumetric filling device (pedal operated)
- Electro-pneumatically operated biactive impulse welding machine with adjustable sealing and cooling time (action control)
- Height-adjustable bag support chute.

D3 machines are designed to work in difficult conditions. The frame and all parts in contact with the product are made of high quality stainless steel. A sealed cabinet protects the electrical and pneumatic control elements.

The D3 models are very compact and require very little maintenance.

For the packaging of liquid and viscous products.
